Aqua Systems AIF technology is a breakthrough because air is introduced through an induction venturi that is built into the control valve. This allows a single tank to be used as an aerator and a filtration system. The AIF systems retain a head of air in the top of the tank during each treatment cycle. Each regeneration process purges

Aqua-Aerobic Systems is continually looking to add to our reconditioned inventory. If you have components you want to sell, please contact one of our Customer Service Representatives.
