A Down-to-Earth Guide to Global Warming, Laurie David and Cambria Gordon How Do We Know What We Know About Our Changing Climate: Scientists and Kids Explore Global Warming, Lynne Cherry Fight Global Warming Now: The Handbook for Taking Action in Your Community, Bill McKibben 50 Simple Things Kids Can Do to Save the Earth, Andrews McMeel Publishing

Global warming is melting glaciers in every region of the world, putting millions of people at risk from floods, droughts and lack of drinking water. It is a complex issue full of uncertainties and controversies. This article discusses amongst cause of global warming and consequences of global warming on the environment.

warming – which is a real possibility for the next century – will be equivalent to losing at least 5 per cent of global GDP each year, now and into the foreseeable future. If a wider range of risks and impacts is taken into account, the estimates of damage could rise to 20 per cent of GDP or more.⁴ By 2020, climate change is projected to expose

atmospheric warming trend slightly larger than at the surface, exactly as models predict. MYTH: The global warming over the past century is nothing unusual. For example, the Medieval Warm Period (MWP), roughly from A.D. 1000 to 1400, was warmer than the 20th century. This indicates the global warming we are experiencing now is part of a natural

global warming hypothesis be rejected. Why, then, is there continuing scientific interest in "global warming"? There is a field of inquiry in which scientists are using computers to try to predict the weather--even global weather over very long periods. But global weather is so complicated that current data and

Note to Teacher: Global Warming Experiment Background Information Our Climate is changing because humans have increased the amount of Greenhouse Gases (GHGs) in the atmosphere. Greenhouse Gases are actually necessary, as they help to keep the earth's surface warm by trapping the earth's heat (the greenhouse effect).
